Professional Summary

Aspiring Web Developer with a BCA degree and strong foundation in both front-end and back-end development. Proficient in HTML, CSS, JavaScript, React, Redux, and API development. Experienced in building dynamic and responsive web applications using modern tools and frameworks. Skilled in problem-solving and writing clean, efficient code. Dedicated to continuously learning industry best practices to grow as a well-rounded software developer.

Technical Skills

- Languages: HTML, CSS, JavaScript

- Frameworks/Libraries: React, Redux, Redux Toolkit, Bootstrap

- Database: MongoDB

- APIs: REST API Development

- Version Control: Git

- Other Skills: Responsive Web Design, Debugging, Testing

Professional Experience

Freelance Web Developer

Jan 2024 – Mar 2024

- Built a flight booking website frontend using HTML, CSS, Bootstrap, and jQuery, ensuring full responsiveness across devices and browsers.
- Collaborated with clients to design user-centric interfaces and functionalities, improving user experience and website performance.

Personal Projects

Trend Hive – eCommerce Website

- Built a fully responsive eCommerce platform for men's and women's fashion.

- Added features like sorting, filtering, product ratings, wish list, and cart with backend storage.

- Utilized React, Bootstrap, Context API, and REST APIs for the front end; Express, CORS, and MongoDB for backend functionality.

- Live Demo: https://e-commerce-app-frontend-liard.vercel.app/

School Management App
- Developed a dynamic CRUD application using React and Redux Toolkit for efficient state management.

- Designed a clean, intuitive UI with Bootstrap for seamless user experience.

- Deployed on Vercel for fast and accessible live hosting.

- Live Demo: https://school-management-app-ten.vercel.app/

Workasana – Project Management App
- Built a collaborative project management tool featuring task creation, user authentication, and team-based workflows.

- Developed multi-select tags for tasks and real-time filtering by team, owner, and status.

- Integrated project-based views, visual reports, and data visualizations to track progress.

- Used useState, useEffect, and filtering logic for dynamic task updates; implemented JWT-based login.

- Live Demo: https://work-asana-frontend.vercel.app/

Meetup App
- Developed a search bar to dynamically filter meetups by title.

- Used fetch to load data with loading/error state handling.

- Implemented state management using useState, along with map and filter functions for rendering filtered results.

- Live Demo: https://meet-up-app-frontend.vercel.app/

Recipe Nest – Full-Stack Recipe App
- Built a full-stack application for browsing and managing recipes.

- Users can add recipes, search by keyword, view detailed instructions using the 'Read More' button, and delete entries.

- Implemented RESTful APIs, MongoDB for backend data storage, and React for the frontend.

- Live Demo: https://recipes-app-frontend-kohl.vercel.app/

Education
- Master of Computer Applications (MCA), Uttaranchal University – 2024

- Bachelor of Computer Applications (BCA), IEC University – 2022

Certifications

- Full Stack Web Development, NeoG Camp – 2024

- Front-end Web Development, NextG Education – 2023

Key Achievements

- Successfully deployed a Redux CRUD app with live features and hosted it on Vercel.
- Built and deployed a fully responsive flight booking site frontend, optimizing UI and ensuring cross-browser compatibility.
- Gained proficiency in using tools like Postman and GitHub for development and collaboration.
